| Program Learning   | Program Learning Outcome   | <u>Dr. Fahmi Rizal, M</u><br>NIP. 19591204198<br>s (PLO)  |  | <u>Faisal Ashar, Ph.D.</u><br>NIP. 19750103 200312 1001                              | Drs. Revian Body, MSA.<br>NIP. 19600103 198503 1003 |         |             |     |  |  |
| Outcomes           | 1. The ability to apply  | basic knowledge   | of science   | ( math, nature science) and other  | er  |         |             |     |  |  |
|                    | in carrying out its pro<br>1.1. Able to show the<br>solve various prob<br>1.2. Having a high und<br>Chemistry (nature<br>1.3. Having deep unde | fessional work <i>(Kno</i><br>good understanding<br>plems in building en<br>derstanding and able<br>science) in buildin<br>rstanding and able | <i>pwledge an</i><br>and to imp<br>gineering t<br>e to impler<br>g engineeri<br>to impleme | blement the basic concept of math t<br>field.<br>nent the basic concept of physic an | o<br>d  |         |             |     |  |  |

| 2. The ability to think critically and creatively in identifying, formulating, problem solving, and evaluating various problems in building engineering vocational education field by using the most appropriate and effective scientific method (Engineering analysis, investigations and assessment). |
|---|
| 2.1. Able to identify technical problem in building engineering   |
| 2.2. Able to analyse technical problems in building engineering aspect.   |
| 2.3. Able to evaluate technical problems in building engineering aspect   |
| 2.4. Able to communicate <i>Engineering Analysis aspects, Investigation and Assessment</i> to students or trainee.  |
| <ol> <li>The reliable ability to plan, implement, and supervise the works in building engineering field. (Engineering design).</li> </ol>   |
|   |
| 3.1. Able to realise as built drawing and cooperate with other stakeholders.  |
| 3.2. Able to manage technical aspects of building as well as environmental, social, helath and safety aspects.  |
| 3.3. Able to supervise technical aspect of buildings.   |
| 3.4. Able to communicate Engineering design matters to students.  |
| 4. Having competency to design, constructs and evaluate learning processes in Building  |
| Engineering Vocational Education (Education design).  |
| 4.1. Able to design curriculum and learning process in building engineering.  |
| 4.2. Able to conduct, control, evaluate and improve the quality of learning process.  |
| 4.3. Able to develop learning media effectively, efficiently and interesting.   |
| 5. The ability to adapt and innovate towards science and technology development and   |
| implement it to the goal of educational and professional work by considering the risk of  |
| non-technical aspect that might be happened. (Engineering practice).  |
| 5.1. Able to innovate and develop technology in building engineering by considering   |
| social, economy and environmental aspects.  |
| 5.2. Able to analyse environmental condition in design, construction and supervision process of building.   |

|                 | <ul> <li>5.3. Implementing information technology and computer into design, construction and supervision process of building.</li> <li>6. Having social and managerial competencies, cooperate, communicate effectively, entrepreneurial character, environmentally knowledgeable, and awareness of longlife learning. <i>(Transferable and softskill)</i>.</li> <li>6.1. Able to work creatively, innovatively, collaboratively, carefully, responsibly, and responsive to environmental change.</li> <li>6.2. Have curiosity and critical thinking, open-minded, and objective.</li> <li>6.3. Able to communicate effectively, and to collaborate in a team work.</li> </ul> |                             |
|-----------------|--|-----------------------------|
| Course Learning | Course Learning Outcomes (CLO):  |                             |
| Outcomes        |  | CDI                         |
|                 | CLO         1. Explain the type of structural systems and structural analysis concept.   | <b>CPL</b><br>1.1, 1.2, 1.3 |
|                 | <ol> <li>Explain the basic of software usage of structural analysis (SAP2000 versi student)</li> </ol>   | 1.3                         |
|                 |  | _                           |
|                 | 3. Analyze continues beam structure  | 1.3, 2.1, 2.2, 2.3, 2.4     |
|                 | 4. Analyze 2D Frame structure.   | 1.3, 2.1, 2.2, 2.3, 2.4     |
|                 | 5. Analyze and design 3D Frame structure.  | 1.3, 2.1, 2.2, 2.3, 2.4     |
|                 | 6. Analyze 2D truss.   | 1.3, 2.1, 2.2, 2.3, 2.4     |
|                 | 7. Analyze and design 3D truss structure.  | 1.3, 2.1, 2.2, 2.3, 2.4     |
|                 | 8. Understand and explain earthquake definition, earthquake types and earthquake occurences.   | 2.1                         |
|                 | 9. Understand and explain risk level of earthquake in Indonesia, earthquake parameters and its   | 2.1, 2.2                    |
|                 | effects to the building.   |                             |
|                 | 10. Understand the basic of design and construction of earthquake resistant housing (minimum   | 2.3, 2.4, 3.2, 3.3, 3.4     |
|                 | requirement of earthquake safer housing) and the repairing method of damaged building.   |                             |
|                 | 11. Analyse and design the structures towards earthquake load by using Static Equivalent Method.   | 5.1, 5.2                    |

|                    | 12. Design structural system based on any laod combination.  | 5.3, 6.1, 6.2, 6.3            |
|--------------------|--|-------------------------------|
|                    |  |                               |
| Course Description | Structural analysis course is application of static, engineering mechanic, steel structure and concrete struct   | ture courses. In this course, |
| ,                  | student can analyse and design structures by applying structural analysis basic of concepts and structural student version). In this subject, students have knowledge about earthquake, earthquake occurences, earth effect of earthquake to building. | analysis software (SAP2000    |

|-----------------|-------------------------------------|
| Code/Credits    | : SIP1.61.5302 / 3                  |
| Type of Exam    | : Open Book                         |
| Dosen           | : Dr. Eng. Prima Yane Putri, ST, MT |
| Time Allocation | : 120 minutes                       |
| Maximum grade   | : 30                                |

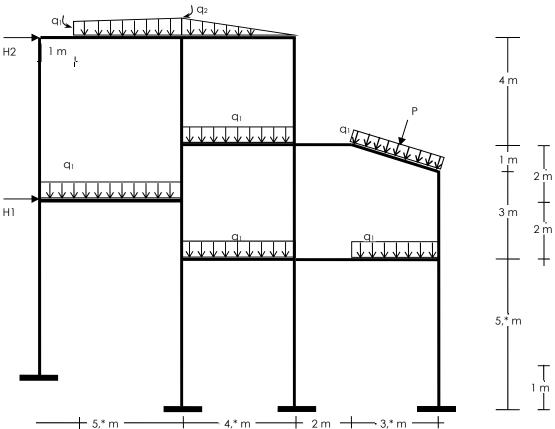

A reinforced concrete structural frame is known as follow

Section properties : structural column dimension : 40 cm, Beam dimension : 30/45 cm

### **Material Properties :**

- Reinforcement spec.  $f_y = 400$  MPa, stirrup spec  $f_y = 240$  MPa, dan concrete  $f_c' = (20+*)$  MPa.
- Concrete poisson :  $\upsilon = 0.20$ , concrete weight :  $\gamma_c = 2400 \text{ kg/m}^3$
- Use reduction factor for concrete as SNI Beton 2019 ØMomen = 0.8, Øtension = 0.65, Øshear = 0.6,
   Øcompression = 0.7

Structural model :

#### **Structural loading :**

- 1. Dead load (DL) : distributed load,  $q_1 = 2,*$  ton/m, trapezium and triangle load ,  $q_1 = 2,*$  ton/m and  $q_2 = 4,*$  ton/m.
- 2. Live load (LL) : Point load P = 3 ton
- 3. Earthquake load (EQ) : H1 = 2,\* ton, H2 = 4,\* ton

*Note* : \* last number of your NIM, ex NIM 12345, \* = 5

### Question :

- 1. (Score: 10) Draw the structural model in SAP200
- 2. *(Score: 5)* Calculate the stress in structural elements (flexural, shear, normal), deformation, restraint reaction considering the selfweight of structure, based on followed loading combination :

| 1. | Fix Loading         | : U = 1,2 DL + 1,6 LL          |
|----|---------------------|--------------------------------|
| 2. | Temporary Loading 1 | : U = 1,2 DL + 0,5 LL + 1,1 EQ |
| 3. | Temporary Loading 2 | : U = 1,2 DL + 0,5 LL - 1,1 EQ |

3. *(Score: 5)* Show load for every loading case and minimum reinforcement section area diagram that needed by the structure.

| No | Type elemen       | Section dimension | Section area and<br>reinforcement detailing<br>Drawing |
|----|-------------------|-------------------|--|
| 1. | Beam 1st storey   |                   |  |
